

Are Photo-Radar service contracts costing your municipality millions?

How rapidly can a single Photo-Lidar system pay for itself?

Assume:

1 unit x 1 hour = average 10 citations @ \$40

5 hours/day : 50 citations x \$40 = \$2000

5 days/week : \$2000 x 5 = \$10,000

4 weeks/month : \$10,000 x 4 = \$40,000
