

# SPEED SIGNS

Ingram Technologies is proud to introduce a new line of user programmable micro-processor controlled speed signs with all the features you could want. High brightness 'LEDs' are easy to read, even in bright daylight conditions. All electronics are housed in a weather resistant, impact resistant fiberglass case that is very lightweight and can be mounted / displayed in a variety of ways. (Suction cups, pole mount, speed trailer etc.)

## FEATURES

Programmable micro-processor control is field changeable by standard 101 type keyboard connection.

- Speed over violation alert
- High speed cut off
- Programmable alarm
- Energy saving 'LED' blanking
- Direction selectable
- Simple reset to factory defaults

## SPECIFICATIONS/OPTIONS

*Direction sensing* doppler radar unit built into each sign (Decateur standard)

Customer option to use your own radar unit - (Stalker Dual / DSR) others available soon. (Contact us for radar compatibility)

Water resistant fiberglass housings / rustproof aluminum hardware

11.5" high LED digits (available in either red or amber)

All necessary mounting hardware included

Includes choice of (4) reflective "SPEED LIMIT" signs for mounting on top of the speed sign.

*All speed signs are designed to fit perfectly with the Ingram Technologies speed trailers.*
